## Dry System Food Waste Composter

(Eco-Wiz Composter EW DCP)

The “ECO-WIZ™” is a totally self-contained, continual feed, organic waste disposal system designed to biologically convert solid food waste materials into compost. Composting your organic wastes not only keeps them out of the landfills, but when applied back into your

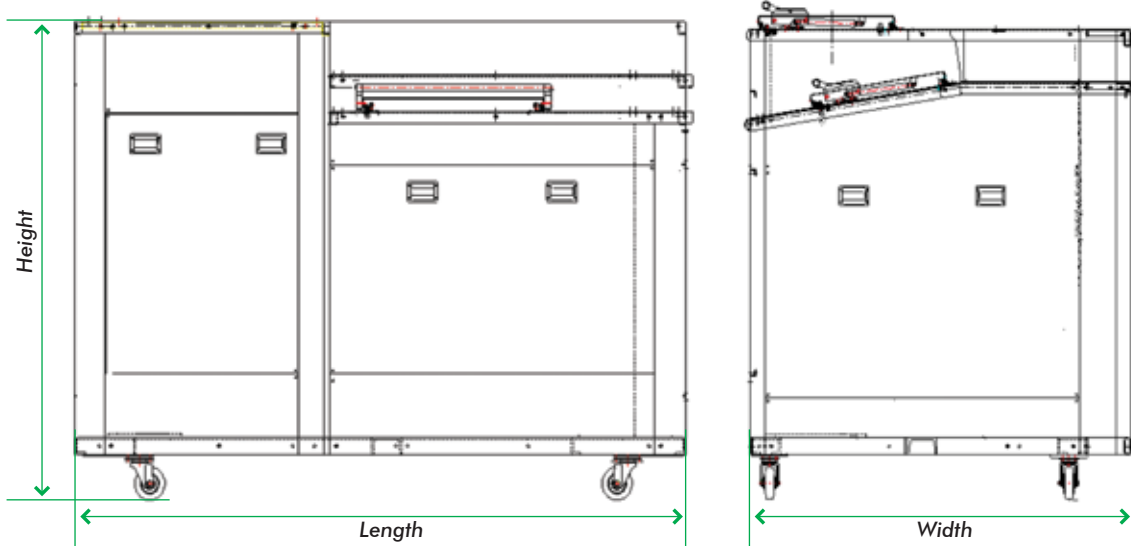

lawn or garden, it also improve the health of your soil. Nutrients were stored in the decaying organic matter. Compost holds these nutrients in a form that is easily absorbed by plant roots.

The primary function of the “ECO-WIZ™” is to accelerate the natural decomposition process by maintaining optimal levels of aeration, moisture, temperature. Under these manipulated environment, our unique microorganisms can safely decompose any food waste at a much faster rate than natural decomposition, without soil and ground water contamination. The “ECO-WIZ™” can safely and quickly decompose any kind of food waste including: vegetable/fruit scraps, raw and cooked meats, fishes, poultries and dairy products.
